Young people and the future

Education for Sustainable development

Youth summit, Iceland 1-3rd of
November 2023

Youth from the nordic countries want:

Knowledge is needed to tackle sustainability issues

Sustainable changes are necessary. Knowledge is power and in order to make changes, knowledge is required!

How can we include sustainability in education?

Integrate sustainability better into the curriculum

- Have a sustainable subject in school. Start a mandatory class for sustainability. It is an important subject that will safeguard our future.
- Teach the teachers about sustainability. In order for teachers to be able to teach the students, they will themselves need to have a deepened knowledge in these issues.
- Give students more power in the curriculum and involve them in deciding how sustainability could be taught.
- Create open and safe spaces for dialogue. Involve the youth and listen to them.
